4 Year Curriculum Objective Checklist

Directions: Use this checklist to see what your child previously knows or has recently learned. Do not approach this as a test or call it a test. Strictly use the information collected to know what areas of learning still need to be addressed. It may be best to complete this chart over several small units of time instead of in one sitting. Take your child's lead. Circle or mark the answers that are incorrect and skip any sections which the child is unable to do. Have the appropriate supplies gathered before beginning.

Letters: Give the child a random tactile letter. Ask her to state the name and phonetic sound of the letter. Then ask her to correctly write the letter on a white board. You may want to make a distinction between the errors that occurred: name, phonetic sound, or writing.
