

Paper Pinwheel Cutting Craft

Supplies: Pencil with an eraser, scissors, decorating supplies, tape, stickpin

Directions: Decorate the square on both sides. Cut out the square staying in the middle of the black line. Cut on the dotted lines. Take corner "A" to the center dot and tape down. Continue with corners B, C, and then D. Insert a stickpin making sure it goes through each corner. Push the pin into the side of a pencil eraser. Leave room on the pin for the pinwheel to spin. If the pin sticks through the eraser, bend it down and tape it to the pencil.
